WORKING EXPERIENCE

Azure Devops Engineer

Exl Service

July,2026 Noida,India

- Designed and maintained CI/CD pipelines using Azure DevOps and YAML, automating builds, testing, and deployments across Dev, UAT, and Production environments.
- Managed Azure infrastructure and DevOps automation using Terraform, Docker, Kubernetes (AKS), Git, PowerShell, and Bash, ensuring secure, reliable, and efficient deployments.

Devops Engineer

Infosys

Nov,2024-July,2026 Noida,India

- Developed and maintained CI/CD pipelines using Azure DevOps, Git, and YAML, automating build, testing, and deployments across Dev, UAT, and Production environments.
- Managed release automation, environment configuration, and deployment troubleshooting, collaborating with development and QA teams to ensure reliable application delivery.

Devops Engineer

Exl Services

Aug, 2022 -Nov,2024 Noida,India

- Developed and maintained CI/CD pipelines using Azure DevOps, Git, and YAML, automating application builds, testing, and deployments across multiple environments.
- Supported Azure cloud infrastructure, Linux servers, and deployment automation using PowerShell and Bash, troubleshooting pipeline failures and ensuring reliable application delivery.

PROJECTS

VeriKYB: Know Your Business (KYB) Verification Platform

- Managed GitHub repositories, branching strategies, and CI/CD pipelines using Azure DevOps, Git, and YAML, automating build validation and streamlining release workflows.
- Designed Dev, UAT, and Production deployment workflows, focusing on Azure infrastructure, Linux administration, PowerShell automation, security, and cost optimization.
- Implemented Git branch protection, pull request validation, and automated quality checks using GitHub and Azure DevOps Pipelines to improve code quality, deployment reliability, and team collaboration.

Financial Account Opening Application

- Designed and maintained CI/CD pipelines using Azure DevOps, Git, and YAML, automating builds, testing, and deployments across Dev, UAT, and Production environments.
- Managed release automation and deployment troubleshooting using Docker, Kubernetes (AKS), and Terraform, ensuring reliable application delivery and seamless downstream system integration.

ACHIEVEMENTS

Super Squad Award (3 times)
Contributed to a top-performing team recognized for achieving exceptional project outcomes, demonstrating strong collaboration, efficiency, and commitment to excellence.

STRENGTHS

- Automation and Continuous Improvement
- Problem-Solving and Root Cause Analysis
- Cloud Infrastructure and CI/CD Expertise
- Cross-Functional Team Collaboration)
- Adaptability and Continuous Learning
- Troubleshooting and Incident Management
- Security and DevOps Best Practices

SKILLS

- **Azure DevOps & CI/CD**
- **Microsoft Azure Cloud**
- **Docker & Kubernetes (AKS)**
- **Terraform & Linux**

EDUCATION

Bachelor of Technology (CSE)

Lovely Professional University

2018 – 2022

CERTIFICATION

Microsoft Certified: Azure Fundamentals

Microsoft

Oct,2026

AWS Cloud Practitioner

EXL

Nov,2026
